

Press Release 2/2019

DYNAmore France moves into new offices in Versailles

Stuttgart/Versailles 1 February 2019

DYNAmore France has moved to a new location in the heart of Versailles. The new premises offer the best conditions for further growth and the expansion and improvement of the range of services.

The new office space marks an important step for DYNAmore France into the future and strengthens the company's position in the French market. The company's new address is:

DYNAmore France SAS
21 av. de Paris
F-78000 Versailles
Tel.: +33 (0)1 39 55 81 01
E-Mail: info@dynamore.eu
www.dynamore.eu

"The new location offers many advantages and is perfectly tailored to our requirements. On the one hand, the offices offer enough space to employ further experts in the field of numerical simulation. On the other hand, our proximity to many software and automotive companies in the greater Paris area, as well as the good connections to public transport, enable us to strengthen our customer relations and reach new interesting companies", explains Nima Edjtemai, commercial director of DYNAmore France.

The fact that DYNAmore France is growing and needs space is also proven by the new engagement of a further engineer at the beginning of the year. This means that five highly qualified simulation specialists are already taking care of the needs of the French DYNAmore customers. A further component for a positive development is the possibility of continuously expanding and expanding the range of seminars. This means that all relevant topics concerning LS-DYNA and LS-OPT can be covered with training courses in France and adapted to the needs of customers.

"We want to expand and improve our support in French", says Ulrich Franz, Managing Director of DYNAmore France. "Now we have created the best conditions to be able to consult our customers in the best possible way", Franz continues.

The team in Versailles is highly motivated and is looking forward to the upcoming tasks as well as many other interesting projects. If you have any questions about the new location, the DYNAmore staff in France and at the headquarters in Stuttgart will be happy to answer them.

About DYNAmore

DYNAmore is dedicated to support engineers in solving nonlinear mechanical as well as multiphysical problems numerically. The product portfolio includes the finite element solver LS-DYNA, the pre- and post-processor LS-PrePost and the optimization software LS-OPT as well as numerous finite element models needed for crashworthiness simulation. The main field of activity is to sell, teach, support, and co-develop the software LS-DYNA and LS-OPT. In addition, DYNAmore provides engineering services for numerical analysis and integrate simulation software in the CAE environment.

DYNAmore offers training including seminars, workshops, webinars, support and information days as well as LS-DYNA user conferences. More detailed information can also be found on our support and tutorial websites. DYNAmore is one of the first addresses for pilot studies and development projects with respect to the simulation of nonlinear dynamic problems. You will find DYNAmore in Stuttgart, Dresden, Ingolstadt, Berlin, Langlingen, Wolfsburg, Zurich (CH), Linköping (S), Gothenburg (S), Versailles (F), Turin (I) and Dublin, Ohio (USA).
